Table 1. Attrition Table, CPRD

	CPRD N	CPRD %
All individuals registered in the data source	5000	
AND have a sex non-missing	5000	100
AND have complete date of death	5000	100
AND have at least a spell	4995	99.9
All individuals registered in the primary care data source with complete basic variables	4995	99.9
AND have a valid year of birth	4995	99.9
AND have linkage with hospital data	4995	99.9
AND are registered during the study period (2012 to 2024)	4995	99.9
AND received dapagliflozin or DPP4i during the enrolment period 1 Jan 2013 to 31 December 2024	4411	88.22
AND have at least one year of recorded medical history in database prior to dapagliflozin or DPP4i	4326	86.52
AND DO NOT have a documented history or diagnosis of Type 1 diabetes at any time prior to index	1946	38.92
AND are aged 40 or older at index	1526	30.52
AND have a diagnosis of T2D prior to index	1468	29.36
AND have either established ACVD or high ACVD risk	880	17.6
AND WERE NOT treated with an SGLT2-I or DPP4-I in previous year	189	3.78
AND DO NOT have a documented history of acute cardiovascular event in the year prior to index	178	3.56
Total Eligible Cohort	178	
Eligible dapagliflozin	45	
Eligible DPP4i	133
